## 2017 annual flying star

Here we explore the annual flying star for 2017 and some of the remedies to help offset the directions and locations that need to be cured and the ones that can be enhanced.

Generally, where we find the good stars we open doors and windows to enable the stars to gain entry.

The landscape plays a part in how well the stars are 'encouraged' in our homes and businesses. For example, when the annual 8, in the period of 8, finds itself sitting on a mountain (large building, large outbuilding, high water tank etc.) it is enhanced, particularly auspicious as it is an earth star. Better still, it likes to find a window or a door to gain entry, to bring its benevolent energies in to help the inhabitants / residents / owners / employees.

When a negative star finds an open door or window it is very happy as it can gain entry to the building. When possible, close off doors and windows or don't use them for the period that these negative energies are at their peak.

When a negative star compounds with another violation then this can bring further difficulties. If you remember, 2016 the negative energies arrived from the tiger, the monkey, the South and the centre of the building / apartment / complex (the annual 2 was in the centre). The tiger belongs to the north east, and the north

east had the annual 5 there – this is a double whammy for someone born the year of the tiger, who has a Ming Gua 5 (1914 (m), 1950 (m), 1986 (m), 2022 (m)- they will always be male. There is a further discussion about the 5 having no location or direction, but because it moves with all the other stars, if you were originally 5 it impacts you too! You also need to attend to the location of the 2 or the 8. That is another discussion though. See the table in the appendix to find out your Ming Gua if you don't know it.

Every building has a centre, if it falls inside the building or just outside, it affects all buildings.

Every building has a centre. If it falls inside the building or just outside (as happens sometimes) about 90% of the time it is within the building this means that EVERYONE was affected by the sickness star when it arrives. In Tasmania (where I live) there were repeated long term infections with the flu. Now they no longer identify the type of flu but the word was it was Influenza A<sup>i</sup> and a whole community was affected by it. Many people reported repeated infections and the re-infection rate was very high. Some

people reported several episodes running back to back. Given the nature of the capsule around the virus it is no wonder that people get re-infected as the immune system thinks it's a different variety and can't call on its virus recognition system to set up a protective shield. It is possible to be reinfected by your own 'version' of Influenza A! The Chinese authorities have just ordered the slaughter of many chickens and aquatic birds as they are very worried about an outbreak in this, their winter season.

### WATER STAR 1

The water star 1 is in the centre 2017. This star is about communication, connection, philosophy, wine industry, transport particularly across water, water distribution systems such as bottled water, mineral waters, spas, underground water sources. The 1 water star has its origins or genesis in the North and affects or connects with Number 2 son. This means that wisdom and communication will be the keynotes for 2017. The wisdom will come from middle aged men. When the star is not performing well it will bring fear, and affect hydration, the kidney, the bones and general chi levels.

Find out your Ming Gua and your Stem and Branch related to your year of birth and find how you will be affected this year.

## 2017 ANNUAL FLYING STAR UPDATES

The 1 is auspicious in most situations. It does not need to be enhanced, just keep the middle of the building clear of junk and obstacles and then use it frequently. You can add symbolic water but NOT actual water.

### DO NOT DISTURB 2017

1. The direction of the Rooster (West) and the Rabbit (East) which is 180° opposite are the key do not disturb areas in 2017
2. The three branches of the East – Tiger, Rabbit and Dragon, whilst there is a good flying star here they are 'do not disturb' areas because they have the five sha there
3. The South Gua has sickness star 5

### THE FLYING STARS

Direction	Home #	Annual Star	Cure / enhance
North	1	6	Enhance – open windows & doors
North East	8	4	Enhance with small water
East - rabbit	3	8	Enhance with care – do not disturb
South East	4	9	Leave alone – open windows and doors
South	9	5	Cure with metal
South West	2	7	Cure with water – check the electrical wiring
West - rooster	7	3	Cure – special configuration – listen the podcast for more information
North West	6	2	Cure with small and frequent water
Centre	5	1	Leave alone, but use every day as often as possible

There are some special formations between the star and the house number so when you have a personalised reading we can look at what these implications are for you and the members of your family or the employees in your business.

### YOUR YEAR OF BIRTH

There is a repeated cycle of stems and branches which correspond with the year

any person is born for example 2017 is the year of the Fire Rooster. Yin Fire is in the South (Li Gua), and the rooster is in the West (the Dui Gua). Additionally, each of those locations has a special number associated with it (home number). The South has number 9 associated with it, and the West has number 7 associated with it. These numbers also correspond with your personal life palace or Ming Gua. If you're not sure about your Ming Gua, there is a table in the appendix (page 5) for you to find yours.

### CYCLE OF 9

The annual flying stars have a cycle of nine palaces which these stars visit every year. The flying star number that corresponds with your Ming Gua is also very important to you each year. This means if you are a male, you have a Ming Gua of 7, and are born in the year of the Fire Rooster, where the Yin Fire, the Rooster and the 7 are located are important to you personally.

In 2017 the flying star 7 lands in the South West. The South-west is the home of Ming Gua 2. In the energy cycle 2 is Earth and 7 is Metal. 7 is less auspicious in the period of 8 so it must be cured. If, in addition, there is Sha Qi in the direction of the Southwest, and you have a door or window located here, this is very inauspicious. You must cure it by not using that door, keeping the shades or curtains drawn, and use Metal and Water to exhaust the 7. *We must use the saltwater cure and a carriage clock or a black faced clock in this location.* If the main bedroom is located here, and you sleep with your head on the South, Southwest or West wall it is best that you relocate your bedroom, where practical, and put your bed head on either the north or the east wall if you are unable to relocate bedrooms. This advice overrides all other recommendations in terms of bedhead and bedrooms. Even under the best of circumstances Feng Shui is under the influence of wind (which can come from any direction) and water (which can arise unnoticed), nothing remains the same. However, there is absolutely no substitute for [having a personal reading done](#), this way everyone is accommodated, and the unique considerations of each building is accounted for, as is your own personal update based on your 4 pillars of destiny.
